CORPORATE PROFILE 公司簡介

China Leason CBM & Shale Gas Group Company Limited and its subsidiaries (collectively referred to as the "Group") currently conduct the business of manufacture and sales of liquefied coalbed gas whose operations are located in the PRC. The Company was incorporated in Cayman Islands as an exempted company with limited liability in July 2002 and was initially listed on the Growth Enterprise Market ("GEM") of The Stock Exchange of Hong Kong Limited on 12 August 2003.

中國聯盛煤層氣頁岩氣產業集團有限公司及其附屬公司(統稱「本集團」)目前在中國經營液化煤層氣生產及銷售業務。本公司於二零零二年七月在開曼群島註冊成立為獲豁免有限公司,本公司股份於二零零三年八月十二日初次在香港聯合交易所有限公司創業板(「創業板」)上市。

The Group is principally engaged in the business of exploitation, liquefaction production and sales of natural gas in the PRC. Headquartered in Beijing. The Group's production of liquefied coalbed gas is in Shanxi Qinshui Basin which boasts the richest liquefied coalbed gas, while its distribution network extends to Shanxi, Guangxi and Guangdong Provinces, etc.

本集團目前主要於中國從事天然氣開採、液化生產及銷售業務。本集團之總部設於北京。本集團的液化煤層氣生產則設於液化煤層氣氣源最豐富的山西沁水盆地,銷售業務覆蓋山西、廣西、廣東等地。

In order to stabilise our natural gas supply and hence raise the utilisation of our liquefied natural gas ("LNG") plant, the Group has made significant investment in resources exploration and exploitation at the coalbed methane blocks located in Yangcheng, Shanxi, since July 2011. As at 31 December 2013, the Group had successfully supplied gas to the LNG plant. The commercial production of coalbed gas has transformed our Group into a vertically integrated natural gas company and continued to enhance our leading position in China's unconventional gas market.

為獲得更為穩定的天然氣供應以提高我們液化天然氣(「液化天然氣」)工廠的利用率,自二零一一年七月起,本集團於山西陽城的煤層氣田的資源勘探及開採方面作出大量投資,且截止二零一三年十二月三十一日,已實現向液化天然氣工廠供氣。煤層氣的商業生產已令本集團成為垂直一體化的天然氣不場的領先地位。

The Group will adhere to the principle of "social responsibility is of overriding importance" while exploring and developing in the new energy sector with an aim to provide the world with high-quality clean energy and keep improving and promoting the harmonious coexistence of man and nature.

本集團將本著「社會責任高於一切」的工作態度,努力在新能源領域不斷探索和發展,為 人類提供優質的清潔能源,持續改善和促進 人與自然的和諧共存。

Dear Shareholders,

I am pleased to present the audited financial results of the Group for the year ended 31 December 2013.

OVERALL BUSINESS REVIEW

After years of development, we have achieved the goal of turning ourselves into a vertically integrated natural gas producer with complete value chain businesses. We have established a complete business process covering CBM extraction, liquefaction, pipelines and highway transportation, distribution network and technical services. As at 31 December 2013, we have completed the ground work and drilling of 228 wells in the Yangcheng gas block which resulted in stable increase of the number of production wells and gas output. The gas supply pipeline connecting Yangcheng gas block Huiyang Company ("Huiyang Company") and Qinshui Shuntai LNG Plant was constructed and put into operation. As Huiyang Company started supply of CBM extracted by it to Qinshui Shuntai LNG Plant, the plant is able to secure more stable gas supply and ready to further improve its utilisation and production cost structure. The supply constraints are gradually unleashing, and we will continue to focus on improving output of production wells and constructing new wells in 2014.

各位股東:

本人欣然呈報本集團截至二零一三年十二月 三十一日止年度之經審核財務業績。

整體業務回顧

經過多年的努力,我們已經實現了將自身打 造為垂直一體化的具有完整產業鏈的天然氣 生產商的目標,建立了包括煤層氣開採、液 化、管道和公路運輸、終端分銷、技術服務 等在內的一整套產業流程,截至二零一三年 十二月三十一日,我們完成了陽城天然氣區 塊228口井的地面施工及打井,生產井數量 和出氣井產量穩步提升,由陽城天然氣區塊 至沁水順泰液化天然氣化工廠管道建成並投 入運行,惠陽公司開採之煤層氣已經能夠供 應沁水順泰液化天然氣工廠, 沁水液化工廠 將能夠獲得更加穩定的氣源供應,產能利用 率和生產成本將進一步得到改善,困擾我們 的原料氣緊缺局面將逐步緩解,而我們也將 繼續把提高生產井產量和建設新井作為2014 年的重點工作。

EXPLORATION AND PRODUCTION BUSINESS REVIEW

During 2013, the construction of new wells was somewhat impacted by our focus on improving capabilities of production wells. However, the unremitting efforts of the management resulted in encouraging progress in the construction of new wells. As at 31 December 2013, we have completed the ground work and drilling of a total of 228 wells, of which 138 wells were producing gas. The gas output volume of the existing production wells amounts to 800 cubic metre per day per well on average. In addition, the gas supply pipeline connecting the gas block and the LNG plant was constructed and put into operation. The Group has started to generate revenue, profit and cash flow from the business of exploitation of natural gas, and its profitability and cash flow position will be further improved as the number and capabilities of production wells further increase.

LNG BUSINESS REVIEW

The shortage of gas supply in the whole LNG industry in Shanxi, including ourselves, has not yet improved significantly, which resulted in a lower utilisation rate of our Qinshui Shuntai LNG plant. However, we made efforts to resume the supply of gas from China United Coalbed Mathane Co. Ltd. (中聯煤層氣有限責任公司) ("China United") during 2013. In addition, Qinshui Shuntai LNG plant has started to receive gas supply from Yangcheng gas block and its utilisation rate has improved gradually as the gas supply pipeline was constructed and put into operation. Qinshui Shuntai LNG plant is expected to turn loss into profit in 2014.

開採及生產業務回顧

液化天然氣業務回顧

山西的整體液化天然氣行業(包括我們自己) 氣源供應緊缺的狀態仍未明顯改善,導致我 們位於沁水順泰液化天然氣廠房利用率偏 低。但在我們的努力下,二零一三年不僅恢 復了中聯煤層氣有限責任公司(「中聯」)的供 氣,同時,隨著管道建設的完工並投入使 用,陽城天然氣區塊的原料氣已經能夠供應 沁水順泰液化天然氣工廠,產能利用率逐步 提升,二零一四年沁水順泰液化天然氣工廠 有望扭虧為盈。

MARKETING BUSINESS REVIEW

After years of development, the Group has developed a diversified customer base comprising industrial, commercial and resident customers and established complete distribution channel and network. In addition, we have also taken different measures to maximise the profitability of our gas sale. During 2013, we used different sales mix and flexibly selected various equipment such as pipeline, cylinder group, gas station and skid-mounted equipment to sell gas to our customers. With commencement of the related work, we will be able to reduce the uncertainty in future natural gas sales and optimise our sales mix, i.e. shifting towards a balanced mix from a residential user dominated mix. We will strive to ramp up the business progressively in 2014, and contribute more earnings to the Group.

EMPHASISE ON TECHNOLOGIES ADVANCEMENT

In order to ensure the smooth development of our exploration and production business, the continuous improvement of technologies and to maintain our leading position in technological advancement, we actively worked with research institutes to build and expand our professional technical team, so as to provide professional and advanced technical services to our exploration and liquefaction production business. In the future, we will be investing heavily in developing and advancing our CBM extraction technology and techniques.

市場營銷業務回顧

經過多年的經營,本集團已經積累了包括工, 業、商業和居民使用者在內的多種客戶群, 形成了完善的銷售終端和管道,此外,我們 亦已採取多項不同的措施來盡可能地改善,我們 們天然氣銷售的利潤率。在二零一三年,我 們通過不同的銷售組合,靈活選擇管道 組、加氣站、撬裝等設備向客戶銷售長不 氣,隨著相關工作進一步推進,我們將能夠 降低未來天然氣銷售中的不確定性,並優化 我們的銷售組合(即由居民用戶主導的組合 轉變為一個更為均衡的組合)。二零一四年 我們仍致力於實現業務的遂步提升,並為本 集團作出更大的盈利貢獻。

注重技術升級

為確保我們的開採及生產業務順利進行,不 斷提升專業技術,保持技術領先,我們積極 開展和相關科研院校的合作,建立和打造我 們專業的技術團隊,為開採和液化生產提供 專業、先進的技術服務。未來我們仍將投入 大量資金來開發及提升我們的煤層氣開採技 術及工藝。

OUTLOOK

At present, demand for natural gas is increasing in China with huge growth potential. As pollution is worsening in China, governments at all levels are placing more emphasis on development of clean energy, which shows great potential in further development, recognising the rising advocacy of safer — especially under the recent nuclear power crisis — and cleaner energy. However, the existing conventional natural gas production is unlikely to satisfy China's strong demand of natural gas in the coming years; and we believe that it is inevitable that the PRC government would need to encourage the unconventional gas production. With all the favourable policies and measures in place, there is no doubt that the Company, as a leading CBM company, will gain major benefits. We will seize this opportunity to grow our CBM business on a long term sustainable basis and would try our very best to maximise our shareholders' investment return.

Lastly, I would like to take this opportunity to thank our team for all their hard work in the past years for turning the Group a better enterprise than I have ever seen. Going forward, I believe that our team will pay more efforts in making the Group a leading enterprise in China's CBM industry.

展望

最後,本人藉此機會,感謝我們的團隊在過去數年中為推動本集團不斷進步而付出的辛勤努力。展望未來,我相信我們的團隊必會加倍努力,將本集團打造為中國煤層氣行業的領先企業。

MANAGEMENT DISCUSSION AND ANALYSIS 管理層討論及分析

FINANCIAL REVIEW

The Group recorded a consolidated turnover of approximately RMB187,184,000 for the year ended 31 December 2013, representing an increase of approximately 1.82% compared with that of the corresponding period in 2012. The increase was mainly attributable to:

the liquefied natural gas ("LNG") plant in Qinshui County, Shanxi Province was shut down for major overhaul between February 2012 and April 2012. However, the production has increased compared with the previous year as the equipment was operating under normal capacity for the year ended 31 December 2013, therefore operating income generated from sales of liquefied coalbed gas and sales of piped natural gas have increased by approximately RMB717,000 and RMB9,273,000 respectively. As the income generated from liquefied coalbed gas has increased, in order to meet the demand for the Group's logistic services, we cut back the external sales of logistics services for the year ended 31 December 2013 which offset the increase in sales of liquefied coalbed gas during the same period.

The Group recorded gross loss of approximately RMB24,285,000 for the year ended 31 December 2013, mainly attributable to:

(i) due to the increase in the production of liquefied coalbed gas, the production cost of liquefied coalbed gas was lowered, resulting in the decrease in gross loss of approximately RMB4,176,000 for the year ended 31 December 2013 as compared with that of the year ended 31 December 2012.

The Group recorded a loss attributable to equity shareholders of the Company for the year ended 31 December 2013 of approximately RMB271,440,000 compared with that of approximately RMB55,130,000 for the year ended 31 December 2012. The reasons for the loss are as follows:

(i) the decrease of approximately RMB50,975,000 in other revenue and net income to approximately RMB4,686,000 for the year ended 31 December 2013 as a result of not receiving any monetary compensation income to for the shortage of electricity supply in the industrial zone for the Year;

本集團於截至二零一三年十二月三十一日止年度錄得毛虧約人民幣24,285,000元,主要來自:

(i) 由於液化煤層氣產量的增加,使液化 煤層氣製造成本降低,導致截至二零 一三年十二月三十一日止年度毛虧比 截至二零一二年十二月三十一日止年 度減少約人民幣4,176,000元。

本集團於截至二零一三年十二月三十一日止年度錄得本公司權益股東應佔虧損約為人民幣271,440,000元,截至二零一二年十二月三十一日止年度則為約人民幣55,130,000元。有關虧損的原因如下:

(i) 截至二零一三年十二月三十一日止年 度之其他收益及淨收入因本年度並無 收取用以補償工業區電力供應短缺的 任何款項而減少約人民幣50,975,000 元至約人民幣4,686,000元;

MANAGEMENT DISCUSSION AND ANALYSIS 管理層討論及分析

- (ii) the loss of approximately RMB163,000,000 arising from impairment on goodwill of our operation of coalbed methane exploration and development, natural gas liquefaction and LNG distribution:
- (iii) the loss of approximately RMB25,000,000 arising from an impairment on intangible assets as a result of the difficult operating environment that has lasted since 2010 in Guangxi Province, the PRC;
- (iv) Shanxi Qinshui Shuntai Energy Development Company Limited, a direct wholly-owned subsidiary of the Company, entered into a conditional finance lease agreement in relation to the sale and lease of equipment with CIMC Capital Limited and a total lease consideration of RMB114,570,000 (subject to adjustments) for a term of 36 months by monthly installments, therefore, it led to an increase of approximately RMB10,731,000 in finance charges on obligations under finance lease to approximately RMB11,677,000 for the Year; and
- (v) the interest expenses on bank and other borrowings wholly repayable within five years increased from approximately RMB6,113,000 to approximately RMB15,010,000 for the year ended 31 December 2013 as a result of the increased in bank and other borrowings due with one year increased from approximately RMB110,600,000 to approximately RMB162,751,000 during the Year.

The property, plant and equipment increased from approximately RMB601,503,000 to approximately RMB782,941,000 during the year ended 31 December 2013. It was mainly contributed to the completion of construction work of gas pipeline placement works, CBM wells and relevant machineries during the Year.

The balance of prepayment relating to construction expenses increased from approximately RMB71,068,000 to approximately RMB123,373,000 during the year ended 31 December 2013, which are mainly constituted by the prepaid expenses on ground work, drilling and pipeline placement for CBM wells.

The balance of the Group's trade and other payables increased significantly by approximately RMB76,972,000 during the year ended 31 December 2013. This was mainly attributable to the increased in property, plant and equipment as a result of Group's focus on natural gas exploration and extraction business in 2013.

- (ii) 我們經營煤層氣勘探及開發、天然氣液化及液化天然氣分銷業務之商譽出現減值虧損約人民幣163,000,000元;
- (iii) 由於中國廣西省的經營環境自二零一零年以來持續艱難,無形資產出現減值虧損約人民幣25,000,000元;
- (iv) 本公司的直接全資附屬公司山西沁水順泰能源發展有限公司與中集融資租賃有限公司簽訂一份有關設備出售及租賃的有條件融資租賃協議,總租賃代價為人民幣114,570,000元(可予調整),為期36個月(按月分期付款),因而導致本年度融資租約承擔之融資費用增加約人民幣10,731,000元至約人民幣11,677,000元;及
- (v) 須於五年內全數償還之銀行及其他借款之利息開支於截至二零一三年十二月三十一日止年度由約人民幣6,113,000元增加至約人民幣15,010,000元,原因為本年度於一年內到期之銀行及其他借款由約人民幣110,600,000元增加至約人民幣162,751,000元。

截至二零一三年十二月三十一日止年度之物業、機器及設備由約人民幣601,503,000元增加至約人民幣782,941,000元。增加之主要原因為本年度之供氣管道鋪設、煤層氣井及相關機械的建設工程經已完工。

截至二零一三年十二月三十一日止年度,與建設開支有關之預付款項之結餘由約人民幣71,068,000元增加至約人民幣123,373,000元,主要包括煤層氣井的地面施工、打井及管道鋪設之預付開支。

截至二零一三年十二月三十一日止年度,本 集團應付賬款及其他應付款項的結餘大幅增 加約人民幣76,972,000元。此乃主要由於二 零一三年本集團致力發展天然氣勘探及開採 業務導致物業、機器及設備增加所致。

BUSINESS REVIEW AND DEVELOPMENT PROSPECTS

Resources and reserves

Yangcheng Huiyang New Energy Development Company Limited (hereinafter referred to as "Huiyang New Energy") has interest in certain coalbed methane (CBM) properties located at Shanxi Province, the PRC. These CBM properties are located at various coal mine areas owned by Shanxi Yangcheng Yangtai Group Industrial Company Limited. Huiyang New Energy is a joint venture company and 60% of its equity interests is held by one of the wholly-owned subsidiary of the Group.

The Company has engaged an independent, US-licensed natural gas reserve engineer, the Netherland, Sewell & Associates, Inc. ("NSAI"), to evaluate the CBM properties reserves as of 31 March 2012. The Yangcheng area is approximately 96 km² in the Shanxi Province, the PRC. Development within the Yangcheng gas block is focused on the #3 and #15 coal seams.

The results of the NSAI reserve evaluation as of 31 March 2012 are summarised as follows:

- 1. Total original gas in place of 272.4 BCF on all blocks
- 2. Net 3P (Proved + Probable + Possible) reserves of 205 BCF
- 3. Net 2P (Proved + Probable) reserves of 27.7 BCF
- 4. Net 1P (Proved) reserves of 3.5 BCF

Gas volumes are expressed in billion of cubic feet (BCF) at standard temperature and pressure bases.

The reserves show in the above table are estimates only and should not be construed as exact quantities. Proved reserves are those quantities of oil and gas which, by analysis of engineering and geoscience data, can be estimated with reasonable certainty to be commercially recoverable; probable and possible reserves are those additional reserves which are sequentially less certain to be recovered that proved reserves. Estimates of reserves may increase or decrease as a result of market conditions, future operations, changes in regulations, or actual reservoir performance.

資源及儲量

陽城縣惠陽新能源發展有限公司(下稱「惠陽新能源」)於位於中國山西省的若干煤層氣資產擁有權益。該等煤層氣資產位於山西陽城陽泰集團實業有限公司擁有的多個煤礦區域內。惠陽新能源為一間合營企業,其60%股本權益由本集團一間全資附屬公司持有。

本公司已委聘獨立美國持牌天然氣儲量工程師Netherland, Sewell & Associates, Inc. (「NSAI」)評估本公司截至二零一二年三月三十一日的煤層氣資產儲量。陽城地區位於中國山西省,面積約96平方公里。陽城天然氣區塊主要開發3號和15號煤層。

NSAI截至二零一二年三月三十一日的儲量評估結果概述如下:

- 1. 所有區塊的原始天然氣地質總含量為 2,724億立方英呎
- 2. 已證實加概略加可能(3P)淨儲量為 2,050億立方英呎
- 3. 已證實加概略(2P)淨儲量為277億立方 英呎
- 4. 已證實(1P)淨儲量為35億立方英呎

天然氣儲量乃按標準溫度及壓力以十億立方 英呎(BCF)表示。

上表所載的儲量僅為估計之數,不應當作實際數量。已證實儲量為透過分析工程及地質數據可合理肯定可作商業性採收而加以估計的石油及天然氣數量:概略及可能儲量為可採收機會較已證實儲量顯著為低的額外儲量。儲量估計可能因市況、未來營運、監管變動或實際儲層情況而增加或減少。

MANAGEMENT DISCUSSION AND ANALYSIS 管理層討論及分析

Natural gas exploration and extraction:

As at 31 December 2013, the Group has already completed the ground work and drilling of 228 CBM wells, of which 138 wells were in production. The average gas production volume of the existing wells ready for immediate gas output is 800 cubic metres per day. The number of wells drilled was slightly below our previous expectation as the Group was focus on increasing the output of production and the stability of gas output. The Board expects to accelerate the drilling program in 2014. The Group expects to complete the ground work and drilling of 70 CBM wells during 2014 and a total of 298 CBM wells by the end of 2014. The average gas production volume of the existing production wells is 800 cubic metres per day per well. The Group expects its overall gas output to exceed 200,000 cubic metres per day by the end of 2014. As the construction of the Group's natural gas pipelines for delivery of gas from the Yangcheng gas block to the Qinshui Shuntai LNG plant has been completed and put into operation, the utilisation rate of Qinshui Shuntai LNG plant is expected to significantly improve in the future.

Liquefaction operation:

As at 31 December 2013, the Group's LNG production capacity was 500,000 cubic metres per day. However, due to the tight supply of domestic natural gas within China, the Group experienced difficulty in sourcing enough natural gas feed for its downstream liquefaction purpose. Therefore, the utilisation of the Group's LNG plants was relatively low and unsatisfactory. However, the above situation has been improved as the production volume of Huiyang New Energy increased. Furthermore, in order to ensure the efficient and safety operation of our equipment, the Group suspended the operation of the LNG plant for an overhaul for the period during which the Group did not secure sufficient gas feed. After the overhaul, the Group expects the LNG plant to become more efficient and cost effective, which will increase the revenue, profit and cashflow contribution to the Group in 2014 because of the increase in our self-produced gas production supply.

天然氣勘探及開採:

於二零一三年十二月三十一日,本集團已完 成了228口煤層氣井的地面施工及打井,其 中,投產井數目為138口。現有的可出氣井 之平均出氣量可達每天800立方米。完成井 數稍微低於我們先前預期,主要是二零一三 年我們重點工作放在了提高產量和穩定出氣 方面。董事會預期將於二零一四年加快打井 進度。本集團預計二零一四年完成70口煤層 氣井的地面施工及打井,至二零一四年年底 累計完成298口煤層氣井的地面施工及打 井。現有的出氣井目前之平均單井出氣量為 每天800立方米。本集團預期在二零一四年 年底之前,其總出氣量可超過每天200,000 立方米。由於本集團將天然氣由陽城天然氣 區塊輸送至沁水順泰液化天然氣工廠的天然 氣管道的建設已完成並投入運營,彼時沁水 順泰液化工廠的產能利用情況亦將大為改 善。

MANAGEMENT DISCUSSION AND ANALYSIS 管理層討論及分析

Marketing and sales:

The Group has developed the vertical integration structure to supply LNG from its LNG plant in Qinshui County, Shanxi Province through its own distribution pipes and through the distribution network in Henan, Hebei and Guangxi provinces to its customers in surrounding areas. The vertical integration structure can reduce the risk of gas supply disruption and increase profit margins. After years of development, the Group has developed a diversified customer base comprising industrial, commercial and resident customers and established complete distribution channel and network. In addition, we have also taken different measures to maximise the profitability of our gas sale. During the Year, we used different sales mix and flexibly selected various equipment such as pipeline, cylinder group, gas station and skid-mounted equipment to sell gas to our customers. With commencement of the related work, we will be able to reduce the uncertainty in future natural gas sales and optimise our sales mix, i.e. shifting towards a balanced mix from a residential user dominated mix. We will strive to ramp up the business progressively in 2014, and contribute more earnings to the Group.

Liquidity, Financial Resources and Capital Structure

As at 31 December 2013, the Group had net assets of approximately RMB820,749,000, including cash and bank balances of approximately RMB17,656,000. To minimise financial risks, the Group implements stringent financial and risk management strategies and avoids the use of highly-geared financing arrangements. The Group's gearing ratio, calculated by the Group's total external borrowings divided by its shareholders' fund, was approximately 12% for the year ended 31 December 2013 (2012: 11%).

The Group is opportunistic in obtaining financing to further improve the cash position given that the natural gas drilling program is capital intensive. If the Group has adequate financing in the future (whether it is from internal cash flow due to increased gas sales, or from fund raising), the Group will accelerate the drilling program. Apart from the intended investment in upstream CBM exploration and extraction, the Group does not have any other plan for acquisition or investment, disposal or scale-down of any current business.

市場營銷及銷售業務:

本集團建立了垂直一體化的結構,透過自身 的分銷管道,由其位於山西省沁水縣的液化 天然氣工廠及河南、河北、廣西的銷售網路 向周邊區域的客戶供應液化天然氣。垂直-體化的結構可降低天然氣供應中斷的風險, 並提升利潤率。經過多年的經營,本集團已 經積累了包括工業、商業和居民使用者在內 的多種客戶群,形成了完善的銷售終端和管 道,此外,我們亦已採取多項不同的措施來 盡可能地改善我們天然氣銷售的利潤率。於 本年度,我們通過不同的銷售組合,靈活選 擇管道、瓶組、加氣站及撬裝等設備向客戶 銷售天然氣。隨著相關工作進一步推進,我 們將能夠降低未來天然氣銷售中的不確定 性,並優化我們的銷售組合(即由居民用戶 主導的組合轉變為一個更為均衡的組合)。 二零一四年我們仍致力於實現業務的遂步提 升,並為本集團作出更大的盈利貢獻。

流動資金、財務資源及資本結構

於二零一三年十二月三十一日,本集團的資產淨值約為人民幣820,749,000元,其中包括現金及銀行結存約人民幣17,656,000元。本集團為減低其財務風險,採取謹慎的財務及風險管理策略,盡量避免使用高槓桿比率之融資安排。故此,本集團於截至二零一三年十二月三十一日止年度之資本與負債比率(按本集團對外借貸總額除以其股東資金計算)約為12%(二零一二年:11%)。

由於天然氣打井項目需要大量資金,本集團有可能為進一步改善現金狀況獲得融資。倘本集團於日後擁有充足融資(無論是來自內部現金流量(因天然氣銷量增長)或者來自融資),本集團將加快打井項目進程。除擬於上游煤層氣勘探及開採進行投資外,本集團並無任何其他計劃進行收購事項或投資、出售或縮減目前的業務規模。

MANAGEMENT DISCUSSION AND ANALYSIS 管理層討論及分析

OUTLOOK

The Board believes that the Company will sustain long term development and maintain its leading position in China's natural gas market given its vertical integration business structure that reduces, or eliminates risks in gas supply, gas price fluctuation and earning visibility. According to the 12th Five-Year Plan for the period from 2011 to 2015 promulgated by the PRC government, natural gas users in China will increase by 100 million to a total of 250 million. On the nationwide gas market basis, the Group has observed inadequate gas supply in general that has rendered midstream gas processing companies in the market in an adverse operating environment causing low utilisation and ongoing loss. Unlike most of the above midstream gas processing companies whose business models only focus on certain areas of the gas production or supply chain, the Group has its own gas production in upstream operation which enhance the Group's self sufficiency in gas supply to the midstream LNG plants and downstream gas sales and distribution, and therefore reducing the gas supply risk in the long run. The current situation of gas supply inadequacy and the consequential loss arising from operations are just temporary and it is likely that the business will turn profitable and show phenomenal growth in the near future as the Group accelerates its gas production and the rising trend of the price of LNG in the PRC continues.

前景

鑑於本公司垂直一體化的業務結構可降低或 消除天然氣供應、天然氣價格波動及盈利能 見度等風險,董事會相信本公司將可實現長 期持續發展及在中國天然氣市場上保持領先 地位。根據中國政府公佈的二零一一年至二 零一五年「十二五規劃」,中國使用天然氣的 人口將新增1億,總量達到2.5億。縱觀全國 天然氣市場,本集團發現天然氣總體供應不 足,令中游天然氣加工企業陷入異常艱難的 經營環境,造成產能利用率低及持續虧損。 與上述大部份僅參與天然氣生產或供應鏈中 某部份的中游天然氣加工企業的業務模式不 同,本集團通過上游業務生產天然氣,並供 應予中游液化天然氣工廠及下游天然氣銷售 及分銷,實現本集團天然氣供應自給自足, 從而在長期內降低天然氣供應風險。目前因 天然氣供應不足造成經營虧損的狀況僅為暫 時性,隨著本集團天然氣生產加速及國內天 然氣價格上漲的趨勢,在不久的將來很有可 能迎來盈利及顯著增長。

MANAGEMENT DISCUSSION AND ANALYSIS 管理層討論及分析

Furthermore, the Group, with its own gas supply, is less affected by gas price fluctuation in the international natural gas market. Moreover, gas price increases in the international market would in fact make our gas products and supply more competitive and increase our profit margin given our lower operation cost resulting from our full participation in the natural gas value chain. The Group believes that its revenue and profit will increase in the long run. More importantly, the vertical integration strategy would enable the Group to sustain long term development and become a strong market leader. After a series of corporate restructuring, the Group believes that the buildout of the Group's vertical integration structure is almost complete and now it is high time for the Group to move to the second stage - the growing phase. The Group expects to turn the business into profitable in the near future. On the upstream exploration and production front, the number of wells ready for gas output would increase and the daily production per well would rise as the wells become more mature. On the other hand, the construction of the pipelines that transport gas to the LNG plants in Qinshui County from the Group's own gas fields has been essentially completed, and China United has resumed gas supply since mid-November 2013 increasing gas supply by approximately 200,000 cubic metre per day. Since then, the Group can increase its own LNG plants utilisation and thus to reduce loss by feeding more self-produced gas to the LNG plants. More importantly, the utilisation of the downstream LNG transportation trunks and the storage facilities would also increase. As the gas price increases, demand for gas in China remains strong and the Group's supply constraints unleash, the Group expects the gas sales in 2014 to grow significantly and the profitability to improve substantially. In the near future, the Group will mainly focus on upstream CBM exploration and production on the existing CBM assets. Meanwhile, the Group will be opportunistic in value-accretive upstream gas asset acquisition, if any.

此外,因本集團擁有自產天然氣原料,其受 國際天然氣市場引起的天然氣價格波動影響 較小。況且,本集團參與天然氣價值鏈的全 部環節,令其擁有較低的營運成本優勢,國 際市場天然氣價格上漲反而有助於增強本集 **国天然氣產品及供應的競爭能力,從而提高** 我們的利潤率。本集團相信從長遠看,其收 入及溢利將會迎來增長。更重要的是,垂直 一體化的策略將有助於本集團實現長期持續 發展,成為卓越的市場領導者。經過一系列 企業重組,本集團認為本集團垂直一體化結 構的構建已基本上完成,目前正是本集團進 入第二階段-增長階段的最佳時機。本集團 預計可於不遠未來將業務發展成為可盈利業 務。上游勘探及生產方面,隨著氣井開發趨 於成熟,可出氣井口數將增加及單井每日出 氣量將上升。另一方面,本集團由自有氣田 輸送至沁水縣液化天然氣工廠的輸氣管道已 基本完成興建,從二零一三年十一月中旬起 中聯恢復供氣,每天可增加供氣量20萬立方 左右。在此之後,本集團可向液化天然氣工 廠輸入更多自產天然氣,藉以提高自有液化 天然氣工廠的利用率,更可以降低虧損。更 重要的是,下游液化天然氣運輸車及倉儲設 施的利用率亦將提高。鑑於中國的天然氣價 格上漲、需求維持強勁及本集團的供應壓力 緩解,本集團預計二零一四年的天然氣銷售 將顯著增長及盈利能力將大幅改善。未來短 期內,本集團將主要專肴於現有煤層氣資產 的上游煤層氣勘探及生產。與此同時,本集 團會把握任何可為上游天然氣資產增值的收 購機會(如有)。

OPINION

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Company and of the Group as at 31 December 2013, and of the Group's loss and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the disclosure requirements of the Hong Kong Companies Ordinance.

EMPHASIS OF MATTER

Without qualifying our opinion, we draw attention to Note 2(b) to the consolidated financial statements which indicates that the Group incurred a net loss of approximately RMB278,761,000 during the year ended 31 December 2013 and, as of that date, the Group's current liabilities exceeded its current assets by approximately RMB361,372,000. These conditions indicate the existence of a material uncertainly that may cast significant doubt about the Group's ability to continue as a going concern.

(a) 守章聲明

For the year ended 31 December 2013 截至二零一三年十二月三十一日止年度

2. SIGNIFICANT ACCOUNTING POLICIES

(Continued)

(a) Statement of compliance (Continued)

The HKICPA has issued certain new and revised HKFRSs that are first effective or available for early adoption for the current accounting period of the Group and the Company. Note 3 provides information on any changes in accounting policies resulting from initial application of these developments to the extent that they are relevant to the Group for the current and prior accounting periods reflected in these consolidated financial statements.

(b) Basis of preparation of the consolidated financial statements

The consolidated financial statements for the year ended 31 December 2013 comprise the Company and its subsidiaries.

The measurement basis used in the preparation of the consolidated financial statements is the historical cost basis, except those disclosed otherwise in the accounting policies below.

The preparation of consolidated financial statements in conformity with HKFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

香港會計師公會已頒佈若干於本 集團及本公司本會計期間首次生 效或可供提前採納之新訂及經修 訂香港財務報告準則。附註3載有 有關於當前及之前會計期間因初 步應用其中與本集團相關之內容 而產生之會計政策變動之資料 有關變動已反映於此等綜合財務 報表內。

(b) 綜合財務報表編製基準

截至二零一三年十二月三十一日 止年度之綜合財務報表包括本公 司及其附屬公司之綜合財務報 表。

除下文之會計政策另有披露者 外,編製綜合財務報表時所用之 計量基準為歷史成本基準。

For the year ended 31 December 2013 截至二零一三年十二月三十一日止年度

2. SIGNIFICANT ACCOUNTING POLICIES

(Continued)

(b) Basis of preparation of the consolidated financial statements (Continued)

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of HKFRSs that have a significant effect on the consolidated financial statements and major sources of estimation uncertainty are discussed in note 4.

Going concern

The Group incurred a net loss of approximately RMB278,761,000 during the year ended 31 December 2013 and, as of that date, the Group's current liabilities exceeded its current assets by approximately RMB361,372,000. These conditions indicate the existence of a material uncertainty which may cast significant doubt about the Group's ability to continue as a going concern and that the Group may be unable to realise its assets and discharge its liabilities in the normal course of business.

2. 主要會計政策(續)

(b) 綜合財務報表編製基準(續)

本集團持續就所作估計及相關假設作出評估。會計估計之變動如只影響當期,則有關影響於估計變動當期確認。如該項會計估計之變動影響當期及以後期間,則有關影響於當期及以後期間確認。

2. SIGNIFICANT ACCOUNTING POLICIES

(Continued)

(b) Basis of preparation of the consolidated financial statements (Continued)

Going concern (Continued)

Provided that these measures can successfully improve the liquidity of the Company, the directors of the Company are satisfied that the Group will be able to meet its financial obligations as and when they fall due for the foreseeable future. According, the consolidated financial statements have been prepared on a going concern basis. Should the Group be unable to operate as a going concern, adjustments would have to be made to write down the value of assets to their recoverable amounts, to provide for further liabilities which might arise and to reclassify non-current assets and liabilities as current assets and liabilities respectively. The effects of these adjustments have not been reflected in the consolidated financial statements.

(c) Subsidiaries and non-controlling interests

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. When assessing whether the Group has power, only substantive rights (held by the Group and other parties) are considered.

An investment in a subsidiary is consolidated into the consolidated financial statements from the date that control commences until the date that control ceases. Intra-group balances, transactions and cash flows and any unrealised profits arising from intra-group transactions are eliminated in full in preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

2. SIGNIFICANT ACCOUNTING POLICIES

(Continued)

(c) Subsidiaries and non-controlling interests

(Continued)

Non-controlling interests represent the equity in a subsidiary not attributable directly or indirectly to the Company, and in respect of which the Group has not agreed any additional terms with the holders of those interests which would result in the Group as a whole having a contractual obligation in respect of those interests that meets the definition of a financial liability. For each business combination, the Group can elect to measure any non-controlling interests either at fair value or at the non-controlling interests' proportionate share of the subsidiary's net identifiable assets.

Non-controlling interests are presented in the consolidated statement of financial position within equity, separately from equity attributable to the equity shareholders of the Company. Non-controlling interests in the results of the Group are presented on the face of the consolidated statement of profit or loss and the consolidated statement of profit or loss and other comprehensive income as an allocation of the total profit or loss and total comprehensive income for the year between non-controlling interests and the equity shareholders of the Company. Loans from holders of non-controlling interests and other contractual obligations towards these holders are presented as financial liabilities in the consolidated statement of financial position in accordance with the accounting policies in note 2 depending on the nature of the liability.

Changes in the Group's interests in a subsidiary that do not result in a loss of control are accounted for as equity transactions, whereby adjustments are made to the amounts of controlling and non-controlling interests within consolidated equity to reflect the change in relative interests, but no adjustments are made to goodwill and no gain or loss is recognised.

2. 主要會計政策(續)

(c) 附屬公司及非控股權益(續)

2. SIGNIFICANT ACCOUNTING POLICIES

(Continued)

(c) Subsidiaries and non-controlling interests

(Continued)

When the Group loses control of a subsidiary, it is accounted for as a disposal of the entire interest in that subsidiary, with a resulting gain or loss being recognised in profit or loss. Any interest retained in that former subsidiary at the date when control is lost is recognised at fair value and this amount is regarded as the fair value on initial recognition of a financial asset (see note 2(e)) or, when appropriate, the cost on initial recognition of an investment in an associate or joint venture.

In the Company's statement of financial position, an investment in a subsidiary is stated at cost less impairment losses (see note 2(j)), unless the investment is classified as held for sale (or included in a disposal group that is classified as held for sale).

(d) Business combinations and goodwill

(i) Business combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets. The choice of measurement basis is made on a transaction-bytransaction basis. Other types of non-controlling interests are measured at their fair value or, when applicable, on the basis specified in another HKFRS.

(i) Business combinations (Continued)

When the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with the corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the "measurement period" (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or a liability is remeasured at subsequent reporting dates in accordance with HKAS 39, or HKAS 37 *Provisions, Contingent Liabilities and Contingent Assets*, as appropriate, with the corresponding gain or loss being recognised in profit or loss.

(i) Business combinations (Continued)

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date (i.e. the date when the Group obtains control) and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if that interest were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), and additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognised at that date.

(ii) Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business (see the accounting policy above) less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) that is expected to benefit from the synergies of the combination.

Goodwill (Continued)

A cash-generating unit to which goodwill has been allocated is tested for impairment annually or more frequently when there is indication that the unit may be impaired. If the recoverable amount of the cashgenerating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit on a pro-rata basis based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

(e) Other investments in debt and equity securities

The Group's and the Company's policies for investments in debt and equity securities, other than investments in subsidiaries, associates and joint ventures, are as follows:

Investments in debt and equity securities are initially stated at fair value, which is their transaction price unless it is determined that the fair value at initial recognition differs from the transaction price and that fair value is evidenced by a quoted price in an active market for an identical asset or liability or based on a valuation technique that uses only data from observable markets. Cost includes attributable transaction costs, except where indicated otherwise below. These investments are subsequently accounted for as follows, depending on their classification:

(e) Other investments in debt and equity securities (Continued)

Investments in securities held for trading are classified as current assets. Any attributable transaction costs are recognised in profit or loss as incurred. At the end of each reporting period the fair value is remeasured, with any resultant gain or loss being recognised in profit or loss. The net gain or loss recognised in profit or loss does not include any dividends or interest earned on these investments as these are recognised in accordance with the policies set out in note 2(t).

Dated debt securities that the Group and/or the Company have the positive ability and intention to hold to maturity are classified as held-to-maturity securities. Held-to-maturity securities are stated at amortised cost less impairment losses (see note 2(j)).

Investments in securities which do not fall into any of the above categories are classified as available-for-sale securities. At the end of each reporting period the fair value is remeasured, with any resultant gain or loss being recognised in other comprehensive income and accumulated separately in equity in the fair value reserve. As an exception to this, investments in equity securities that do not have a quoted price in an active market for an identical instrument and whose fair value cannot otherwise be reliably measured are recognised in the statement of financial position at cost less impairment losses (see note 2(j)). Dividend income from equity securities and interest income from debt securities calculated using the effective interest method are recognised in profit or loss in accordance with the policies set out in note 2(t). Foreign exchange gains and losses resulting from changes in the amortised cost of debt securities are also recognised in profit or loss.

Derivative financial instruments are recognised initially at fair value. At the end of each reporting period the fair value is remeasured. The gain or loss on remeasurement to fair value is recognised immediately in profit or loss, except where the derivatives qualify for cash flow hedge accounting or hedge the net investment in a foreign operation, in which case recognition of any resultant gain or loss depends on the nature of the item being hedged.

Property, plant and equipment (other than construction in progress) are stated at cost less accumulated depreciation and impairment losses (see note 2(j)).

The cost of self-constructed items of property, plant and equipment includes the cost of materials, direct labour, the initial estimate, where relevant, of the costs of dismantling and removing the items and restoring the site on which they are located, and an appropriate proportion of production overheads and borrowing costs (see note 2(v)).

Gains or losses arising from the retirement or disposal of an item of property, plant and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognised in profit or loss on the date of retirement or disposal. Any related revaluation surplus is transferred from the revaluation reserve to retained profits/accumulated losses and is not reclassified to profit or loss.

Depreciation is calculated to write off the cost of items of property, plant and equipment, less their estimated residual value, if any, using the straight line method over their estimated useful lives as follows:

 Buildings held for own use 	Over the shorter of
	unexpired term of th
	leases or 30 years

 Leasehold improvements 	2-5 years
Pipelines	5-20 years
 Plant and machinery 	3-10 years
 Computer equipment 	3-5 years
 Furniture and equipment 	3-10 years
 Transportation and 	4-10 years
motor vehicles	

Where parts of an item of property, plant and equipment have different useful lives, the cost of the item is allocated on a reasonable basis between the parts and each part is depreciated separately. Both the useful life of an asset and its residual value, if any, are reviewed annually.

(g) Property, plant and equipment (Continued)

Construction in progress represents property, plant and equipment under construction and pending installation and is stated at cost less accumulated impairment losses, if any. Cost includes the costs of construction of the buildings, the costs of plant and machinery and interest charges arising from borrowings used to finance these assets during the period of construction or installation and testing. No provision for depreciation is made on construction in progress until such time the relevant assets are completed and are available for their intended use. When the assets concerned are brought into use, the costs are transferred to other property, plant and equipment and depreciated in accordance with the policy as stated above.

Expenditure on the construction, installation or completion of infrastructure facilities such as platforms, pipelines and the drilling of commercially proven development wells but do not include geological and geophysical costs which are expensed directly to profit or loss as they are incurred, is capitalised as coalbed methane development costs within construction in progress. Coalbed methane development costs are stated at cost less any identified impairment loss. Coalbed methane development costs are classified to the appropriate category of property, plant and equipment when completed and ready for intended use. Depreciation on these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Tangible assets acquired for use in well drilling works of ground drainage activities are classified as property, plant and equipment.

(h) Intangible assets (other than goodwill)

Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

Other intangible assets that are acquired by the Group are stated at cost less accumulated amortisation (where the estimated useful life is finite) and impairment losses (see note 2(j)).

Amortisation of intangible assets with finite useful lives is charged to profit or loss on a straight-line basis over the assets' estimated useful lives. Intangible assets with finite useful lives are amortised from the date they are available for use over their estimated useful lives.

Both the period and method of amortisation are reviewed annually.

Intangible assets are not amortised while their useful lives are assessed to be indefinite. Any conclusion that the useful life of an intangible asset is indefinite is reviewed annually to determine whether events and circumstances continue to support the indefinite useful life assessment for that asset. If they do not, the change in the useful life assessment from indefinite to finite is accounted for prospectively from the date of change and in accordance with the policy for amortisation of intangible assets with finite lives as set out above.

(i) Leased assets

An arrangement, comprising a transaction or a series of transactions, is or contains a lease if the Group determines that the arrangement conveys a right to use a specific asset or assets for an agreed period of time in return for a payment or a series of payments. Such a determination is made based on an evaluation of the substance of the arrangement and is regardless of whether the arrangement takes the legal form of a lease.

(i) Classification of assets leased to the Group

Assets that are held by the Group under leases which transfer to the Group substantially all the risks and rewards of ownership are classified as being held under finance leases. Leases which do not transfer substantially all the risks and rewards of ownership to the Group are classified as operating leases, except that land held for own use under an operating lease, the fair value of which cannot be measured separately from the fair value of a building situated thereon at the inception of the lease, is accounted for as being held under a finance lease, unless the building is also clearly held under an operating lease. For these purposes, the inception of the lease is the time that the lease was first entered into by the Group, or taken over from the previous lessee.

(ii) Assets acquired under finance leases

Where the Group acquires the use of assets under finance leases, the amounts representing the fair value of the leased asset, or, if lower, the present value of the minimum lease payments, of such assets are included in property, plant and equipment and the corresponding liabilities, net of finance charges, are recorded as obligations under finance leases. Depreciation is provided at rates which write off the cost or valuation of the assets over the term of the relevant lease or, where it is likely the group will obtain ownership of the asset, the life of the asset, as set out in note 2(g). Impairment losses are accounted for in accordance with the accounting policy as set out in note 2(j). Finance charges implicit in the lease payments are charged to profit or loss over the period of the leases so as to produce an approximately constant periodic rate of charge on the remaining balance of the obligations for each accounting period. Contingent rentals are charged to profit or loss in the accounting period in which they are incurred.

(iii) Operating lease charges

Where the Group has the use of assets held under operating leases, payments made under the leases are charged to profit or loss in equal instalments over the accounting periods covered by the lease term, except where an alternative basis is more representative of the pattern of benefits to be derived from the leased asset. Lease incentives received are recognised in profit or loss as an integral part of the aggregate net lease payments made. Contingent rentals are charged to profit or loss in the accounting period in which they are incurred.

(j) Impairment of assets (Continued)

Impairment of investments in debt and equity securities and other receivables (Continued)

For trade and other current receivables and other financial assets carried at amortised cost, the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows, discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition of these assets), where the effect of discounting is material. This assessment is made collectively where these financial assets share similar risk characteristics, such as similar past due status, and have not been individually assessed as impaired. Future cash flows for financial assets which are assessed for impairment collectively are based on historical loss experience for assets with credit risk characteristics similar to the collective group.

If in a subsequent period the amount of an impairment loss decreases and the decrease can be linked objectively to an event occurring after the impairment loss was recognised, the impairment loss is reversed through profit or loss. A reversal of an impairment loss shall not result in the asset's carrying amount exceeding that which would have been determined had no impairment loss been recognised in prior years.

(j) Impairment of assets (Continued)

(i) Impairment of investments in debt and equity securities and other receivables (Continued)

For available-for-sale securities, the cumulative loss that has been recognised in the fair value reserve is reclassified to profit or loss. The amount of the cumulative loss that is recognised in profit or loss is the difference between the acquisition cost (net of any principal repayment and amortisation) and current fair value, less any impairment loss on that asset previously recognised in profit or loss.

Impairment losses recognised in profit or loss in respect of available-for-sale equity securities are not reversed through profit or loss. Any subsequent increase in the fair value of such assets is recognised in other comprehensive income.

Impairment losses in respect of available-forsale debt securities are reversed if the subsequent increase in fair value can be objectively related to an event occurring after the impairment loss was recognised. Reversals of impairment losses in such circumstances are recognised in profit or loss.

Impairment of investments in debt and equity securities and other receivables (Continued)

Impairment losses are written off against the corresponding assets directly, except for impairment losses recognised in respect of trade debtors and bills receivable included within trade and other receivables, whose recovery is considered doubtful but not remote. In this case, the impairment losses for doubtful debts are recorded using an allowance account. When the Group is satisfied that recovery is remote, the amount considered irrecoverable is written off against trade debtors and bills receivable directly and any amounts held in the allowance account relating to that debt are reversed. Subsequent recoveries of amounts previously charged to the allowance account are reversed against the allowance account. Other changes in the allowance account and subsequent recoveries of amounts previously written off directly are recognised in profit or loss.

Impairment of other assets

Internal and external sources of information are reviewed at the end of each reporting period to identify indications that the following assets may be impaired or, except in the case of goodwill, an impairment loss previously recognised no longer exists or may have decreased:

- goodwill;
- property, plant and equipment;
- prepaid lease payments for land under operating leases;
- intangible assets;
- deposits and prepayments; and
- investments in subsidiaries in the Company's statement of financial position.

If any such indication exists, the asset's recoverable amount is estimated. In addition, for goodwill, intangible assets that are not yet available for use and intangible assets that have indefinite useful lives, the recoverable amount is estimated annually whether or not there is any indication of impairment.

Calculation of recoverable amount

The recoverable amount of an asset is the greater of its fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Where an asset does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the smallest group of assets that generates cash inflows independently (i.e. a cash-generating unit).

Impairment of other assets (Continued)

Recognition of impairment losses

An impairment loss is recognised in profit or loss if the carrying amount of an asset, or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment losses recognised in respect of cashgenerating units are allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit (or group of units) and then, to reduce the carrying amount of the other assets in the unit (or group of units) on a pro rata basis, except that the carrying value of an asset will not be reduced below its individual fair value less costs of disposal (if measurable) or value in use (if determinable).

Reversals of impairment losses

In respect of assets other than goodwill, an impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount. An impairment loss in respect of goodwill is not reversed.

A reversal of an impairment loss is limited to the asset's carrying amount that would have been determined had no impairment loss been recognised in prior years. Reversals of impairment losses are credited to profit or loss in the year in which the reversals are recognised.

(iii) Interim financial reporting and impairment

Under the GEM Listing Rules, the Group is required to prepare an interim financial report in compliance with HKAS 34, *Interim Financial Reporting*, in respect of the first six months of the financial year. At the end of the interim period, the Group applies the same impairment testing, recognition, and reversal criteria as it would at the end of the financial year (see notes 2(j)(i) and (ii)).

Impairment losses recognised in an interim period in respect of goodwill, available-for-sale equity securities and unquoted equity securities carried at cost are not reversed in a subsequent period. This is the case even if no loss, or a smaller loss, would have been recognised had the impairment been assessed only at the end of the financial year to which the interim period relates. Consequently, if the fair value of an available-for-sale equity security increases in the remainder of the annual period, or in any other period subsequently, the increase is recognised in other comprehensive income and not profit or loss.

(k) Inventories

Inventories are carried at the lower of cost and net realisable value.

Cost is calculated using the weighted average cost formula and comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

(I) Trade and other receivables

Trade and other receivables are initially recognised at fair value and thereafter stated at amortised cost using the effective interest method, less allowance for impairment of doubtful debts (see note 2(j)), except where the receivables are interest-free loans made to related parties without any fixed repayment terms or the effect of discounting would be immaterial. In such cases, the receivables are stated at cost less allowance for impairment of doubtful debts.

(m) Convertible bonds

Convertible bonds issued by the Company are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. Conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument. An equity instrument is any contract that evidences a residual interest in the assets of any entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. This amount is recorded as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

The conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to share premium. Where the conversion option remains unexercised at the maturity date of the convertible bonds, the balance recognised in equity will be transferred to retained profits/accumulated losses. No gain or loss is recognised in profit or loss upon conversion or expiration of the conversion option.

Transaction costs that relate to the issue of the convertible bonds are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity in the convertible bonds reserve. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the lives of the convertible bonds using the effective interest method.

Trade and other payables are initially recognised at fair value. Except for financial guarantee liabilities measured in accordance with note 2(x), trade and other payables are subsequently stated at amortised cost unless the effect of discounting would be immaterial, in which case they are stated at cost.

Cash and cash equivalents comprise cash at bank and on hand, demand deposits with banks and other financial institutions, and short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, having been within three months of maturity at acquisition. The fair value of share options granted to employees is recognised as an employee cost with a corresponding increase in a share option reserve within equity. The fair value is measured at grant date using the Binomial option pricing model, taking into account the terms and conditions upon which the options were granted. Where the employees have to meet vesting conditions before becoming unconditionally entitled to the share options, the total estimated fair value of the share options is spread over the vesting period, taking into account the probability that the options will vest.

On vesting date, the amount recognised as an expense is adjusted to reflect the actual number of options that vest (with a corresponding adjustment to the share option reserve) except where forfeiture is only due to not achieving vesting conditions that relate to the market price of the Company's shares. The equity amount is recognised in the share option reserve until either the option is exercised (when it is transferred to the share premium account) or the option expires (when it is released directly to the retained profits/ accumulated losses).

(r) Income tax

Income tax for the year comprises current tax and movements in deferred tax assets and liabilities. Current tax and movements in deferred tax assets and liabilities are recognised in profit or loss except to the extent that they relate to items recognised in other comprehensive income or directly in equity, in which case the relevant amounts of tax are recognised in other comprehensive income or directly in equity, respectively.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax assets also arise from unused tax losses and unused tax credits.

Apart from certain limited exceptions, all deferred tax liabilities, and all deferred tax assets to the extent that it is probable that future taxable profits will be available against which the asset can be utilised, are recognised. Future taxable profits that may support the recognition of deferred tax assets arising from deductible temporary differences include those that will arise from the reversal of existing taxable temporary differences, provided those differences relate to the same taxation authority and the same taxable entity, and are expected to reverse either in the same period as the expected reversal of the deductible temporary difference or in periods into which a tax loss arising from the deferred tax asset can be carried back or forward. The same criteria are adopted when determining whether existing taxable temporary differences support the recognition of deferred tax assets arising from unused tax losses and credits, that is, those differences are taken into account if they relate to the same taxation authority and the same taxable entity, and are expected to reverse in a period, or periods, in which the tax loss or credit can be utilised.

The limited exceptions to recognition of deferred tax assets and liabilities are those temporary differences arising from goodwill not deductible for tax purposes, the initial recognition of assets or liabilities that affect neither accounting nor taxable profit (provided they are not part of a business combination), and temporary differences relating to investments in subsidiaries to the extent that, in the case of taxable differences, the Group controls the timing of the reversal and it is probable that the differences will not reverse in the foreseeable future, or in the case of deductible differences, unless it is probable that they will reverse in the future.

The amount of deferred tax recognised is measured based on the expected manner of realisation or settlement of the carrying amount of the assets and liabilities, using tax rates enacted or substantively enacted at the end of the reporting period. Deferred tax assets and liabilities are not discounted.

The carrying amount of a deferred tax asset is reviewed at the end of each reporting period and is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the related tax benefit to be utilised. Any such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

Additional income taxes that arise from the distribution of dividends are recognised when the liability to pay the related dividends is recognised.

Current tax balances and deferred tax balances, and movements therein, are presented separately from each other and are not offset. Current tax assets are offset against current tax liabilities, and deferred tax assets against deferred tax liabilities, if the Company or the Group has the legally enforceable right to set off current tax assets against current tax liabilities and the following additional conditions are met:

Amendments to HKAS 1, Presentation of Financial Statements — Presentation of Items of Other Comprehensive Income

The amendments require entities to present separately the items of other comprehensive income that would be reclassified to profit or loss in the future if certain conditions are met from those that would never be reclassified to profit or loss. The presentation of other comprehensive income in the consolidated statement of profit or loss and other comprehensive income in these consolidated financial statements has been modified accordingly. In addition, the Group has chosen to use the new titles "statement of profit or loss" and "statement of profit or loss and other comprehensive income" as introduced by the amendments in these consolidated financial statements.

HKFRS 10, Consolidated Financial Statements

HKFRS 10 replaces the requirements in HKAS 27, Consolidated and separate financial statements relating to the preparation of consolidated financial statements and HK-SIC 12 Consolidation — Special purpose entities. It introduces a single control model to determine whether an investee should be consolidated, by focusing on whether the entity has power over the investee, exposure or rights to variable returns from its involvement with the investee and the ability to use its power to affect the amount of those returns.

As a result of the adoption of HKFRS 10, the Group has changed its accounting policy with respect to determining whether it has control over an investee. The adoption does not change any of the control conclusions reached by the Group in respect of its involvement with other entities as at 1 January 2013.

HKFRS 11, Joint Arrangements

HKFRS 11, which replaces HKAS 31, *Interests in joint ventures*, divides joint arrangements into joint operations and joint ventures. Entities are required to determine the type of an arrangement by considering the structure, legal form, contractual terms and other facts and circumstances relevant to their rights and obligations under the arrangement. Joint arrangements which are classified as joint operations under HKFRS 11 are recognised on a line-by-line basis to the extent of the joint operator's interest in the joint operation. All other joint arrangements are classified as joint ventures under HKFRS 11 and are required to be accounted for using the equity method in the Group's consolidated financial statements. Proportionate consolidation is no longer allowed as an accounting policy choice.

HKFRS 12, Disclosure of Interests in Other Entities

HKFRS 12 brings together into a single standard all the disclosure requirements relevant to an entity's interests in subsidiaries, joint arrangements, associates and unconsolidated structured entities. The disclosures required by HKFRS 12 are generally more extensive than those previously required by the respective standards. To the extent that the requirements are applicable to the Group, the Group has provided those disclosures in note 20.

HKFRS 13, Fair Value Measurement

HKFRS 13 replaces existing guidance in individual HKFRSs with a single source of fair value measurement guidance. HKFRS 13 also contains extensive disclosure requirements about fair value measurements for both financial instruments and non-financial instruments. To the extent that the requirements are applicable to the Group, the Group has provided those disclosures in these consolidated financial statements. The adoption of HKFRS 13 does not have any material impact on the fair value measurements of the Group's assets and liabilities.

Revised HKAS 19, Employee Benefits

Revised HKAS 19 introduces a number of amendments to the accounting for defined benefit plans. Among them, revised HKAS 19 eliminates the "corridor method" under which the recognition of actuarial gains and losses relating to defined benefit schemes could be deferred and recognised in profit or loss over the expected average remaining service lives of employees. Under the revised standard, all actuarial gains and losses are required to be recognised immediately in other comprehensive income. Revised HKAS 19 also changed the basis for determining income from plan assets from expected return to interest income calculated at the liability discount rate, and requires immediate recognition of past service cost, whether vested or not.

Annual Improvements to HKFRSs 2009-2011 Cycle

This cycle of annual improvements contains amendments to five standards with consequential amendments to other standards and interpretations. Among them, HKAS 1 has been amended to clarify that an opening statement of financial position is required only when a retrospective application of an accounting policy, a retrospective restatement or a reclassification has a material effect on the information presented in the opening statement of financial position. The amendments also remove the requirement to present related notes to the opening statement of financial position when such statement is presented.

Amendments to HKFRS 7 — Disclosures — Offsetting Financial Assets and Financial Liabilities

The amendments introduce new disclosures in respect of offsetting financial assets and financial liabilities. Those new disclosures are required for all recognised financial instruments that are set off in accordance with HKAS 32, *Financial instruments: Presentation* and those that are subject to an enforceable master netting arrangement or similar agreement that covers similar financial instruments and transactions, irrespective of whether the financial instruments are set off in accordance with HKAS 32.

The adoption of the amendments does not have an impact on these consolidated financial statements because the Group has not offset financial instruments, nor has it entered into master netting arrangement or similar agreement which is subject to the disclosures of HKFRS 7 during the periods presented.

The directors consider that other than the additional disclosures, the adoption of the new HKFRSs and amendments to HKFRSs has no material effect on the Group's consolidated financial statements.

4. ACCOUNTING JUDGEMENTS AND ESTIMATES

Judgements and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

(a) Sources of estimation uncertainty

Key sources of estimation uncertainty are as follows:

(i) Estimation of impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cashgenerating units ("CGU(s)") to which goodwill has been allocated. The value in use calculation requires the Group to estimate the future cash flows expected to arise from the CGU and a suitable discount rate in order to calculate the present value. Where the actual future cash flows are less than expected, a material impairment loss may arise. As at 31 December 2013, the carrying amount of the Group's goodwill was approximately RMB104,298,000 (2012: RMB267,298,000). Details of the recoverable amount calculation are disclosed in note 15.

During the year ended 31 December 2013, an impairment loss of approximately RMB163,000,000 (2012: Nil) was recognised in the consolidated statement of profit or loss resulting in the carrying amount of the coalbed methane exploration and development, natural gas liquefaction and liquefied natural gas ("LNG") distribution CGU being written down to its recoverable amount.

4. 會計判斷及估計

判斷及估計將按過往經驗及其他因素 (包括相信在當時情況下合理發生之預 期未來事項)作出持續評估。

(a) 估計不確定性之來源

估計不確定性之主要來源如下:

(i) 商譽減值之估計

釐定商譽是否出現減值須估 計獲分配商譽之現金產生單 位(「現金產生單位」)之使用 價值。計算使用價值時,本 集團需估計現金產生單位預 期產生之未來現金流量,以 及一個合適之貼現率以計算 現值。倘未來現金流量之實 際金額少於預期,則會產生 重大減值虧損。於二零一三 年十二月三十一日,本集團 商譽之賬面值約為人民幣 104,298,000元(二零一二 年:人民幣267,298,000 元)。可收回金額之計算詳 情於附註15披露。

截至二零一三年十二月三十一日止年度,於綜合損益表確認約人民幣163,000,000元(二零一二年:無)的減值虧損,導致煤層氣勘探及開發、天然氣液化及液化天然氣(「液化天然氣」)分銷現金產生單位的賬面值撇減至其可收回金額。

For the year ended 31 December 2013 截至二零一三年十二月三十一日止年度

4. ACCOUNTING JUDGEMENTS AND ESTIMATES (Continued)

(a) Sources of estimation uncertainty (Continued)

(i) Estimation of impairment of goodwill (Continued)

During the year ended 31 December 2012, an impairment loss of approximately RMB2,339,000 was recognised in the consolidated statement of profit or loss resulting in the carrying amount of the piped natural gas CGU located in Guangxi being written down to its recoverable amount.

(ii) Estimation of impairment of intangible assets

The Group performs annual tests on whether there has been impairment of intangible assets in accordance with the accounting policy stated in note 2(j). The recoverable amounts of CGUs are determined based on value in use calculations. These calculations require the use of estimates and assumptions made by management on the future operation of the business, pre-tax discount rates, and other assumptions underlying the value in use calculations. As at 31 December 2013, the carrying amount of the Group's intangible assets was approximately RMB309,988,000 (2012: RMB365,231,000).

An impairment loss of approximately RMB25,000,000 (2012: Nil) was recognised in the consolidated statement of profit or loss for the year ended 31 December 2013 resulting in the carrying amount of the piped natural gas CGU located in Guangxi being written down to its recoverable amount.

4. 會計判斷及估計(續)

(a) 估計不確定性之來源(續)

(i) 商譽減值之估計(續)

截至二零一二年十二月三十一日止年度,於綜合損益表確認約人民幣2,339,000元的減值虧損,導致位於廣西的管道天然氣現金產生單位的賬面值撇減至其可收回金額。

(ii) 估計無形資產減值

截至二零一三年十二月三十一日止年度,於綜合損益表確認約人民幣25,000,000元(二零一二年:無)的減值虧損,導致位於廣西的管道天然氣現金產生單位的賬面值撇減至其可收回金額。

For the year ended 31 December 2013 截至二零一三年十二月三十一日止年度

4. ACCOUNTING JUDGEMENTS AND ESTIMATES (Continued)

(a) Sources of estimation uncertainty (Continued)

(iii) Useful lives and residual values of property, plant and equipment

Management determines the estimated useful lives and residual values for the Group's property, plant and equipment in accordance with the accounting policy stated in note 2(g). The Group will revise the depreciation charge where useful lives and residual values are different from previous estimates, or will write off or write down technically obsolete or non-strategic assets that have been abandoned or sold. As at 31 December 2013, the carrying amount of the Group's property, plant and equipment was approximately RMB782,941,000 (2012: RMB601,503,000).

(iv) Amortisation of intangible assets

Intangible assets are amortised on a straight-line basis over their estimated useful lives in accordance with the accounting policy stated in note 2(h). The determination of the useful lives involves management's estimation. The Group re-assesses the useful life of the intangible assets and, if the expectation differs from the original estimate, such a difference may impact the amortisation in the year and the estimate will be changed in the future period.

4. ACCOUNTING JUDGEMENTS AND ESTIMATES (Continued)

(a) Sources of estimation uncertainty (Continued)

(v) Estimation of impairment of trade and other receivables

The policy for recognising impairment on receivables of the Group is based on an evaluation of the collectibility and ageing analysis of accounts and on management's judgement. A considerable amount of judgement is required in assessing the ultimate realisation of these receivables, including the current creditworthiness and the past collection history of each debtor. If the financial conditions of the Group's debtors were to deteriorate, resulting in an impairment of their ability to make payments, additional impairment may be required.

(vi) Net realisable value of inventories

Inventories are stated at the lower of cost and net realisable value. Net realisable value is determined on the basis of the estimated selling price less the estimated cost of completion and the estimated costs necessary to make the sale. Management estimates the net realisable value for inventories based primarily on the latest invoice prices and current market conditions. As at 31 December 2013, the carrying amount of the Group's inventories was approximately RMB7,875,000 (2012: RMB5,949,000).

(vii) Valuation of share options granted

The fair value of share options granted to employees were calculated using the Binomial option pricing model involving estimates including estimated life of share options granted, future dividends and volatility of share price.

For the year ended 31 December 2013 截至二零一三年十二月三十一日止年度

4. ACCOUNTING JUDGEMENTS AND ESTIMATES (Continued)

(a) Sources of estimation uncertainty (Continued)

(viii) Income taxes

Determining income tax provisions involves judgement on the future tax treatment of certain transactions. The Group carefully evaluates tax implications of transactions and tax provisions are set-up accordingly. The tax treatment of such transactions is reconsidered periodically to take into account changes in tax legislations. Deferred tax assets are recognised for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies.

(b) Critical accounting judgements in applying the Group's accounting policies

In the process of applying the Group's accounting policies, management has made the following critical accounting judgements:

(i) Renewal of gas business operating permits

The Group holds certain gas business operating permits with licence period of 1 to 5 years at date of issue which will be expired in year 2014 to 2018 and the renewal of which is subject to the approval by the relevant PRC authorities. In the opinion of the directors, taking into account legal opinion from the Company's PRC legal counsel, there are no legal impediments for the Group to renew its gas business operating permits upon expiry.

4. ACCOUNTING JUDGEMENTS AND ESTIMATES (Continued)

(b) Critical accounting judgements in applying the Group's accounting policies (Continued)

(i) Renewal of gas business operating permits (Continued)

If the Group were unable to renew these permits upon expiry, the carrying amounts of the Group's goodwill and intangible assets of approximately RMB104,298,000 (2012: RMB267,298,000) and RMB309,988,000 (2012: RMB365,231,000) respectively might be significantly reduced, and the Group might increase amortisation charges of those assets where their useful lives are less than previously estimated, or it might write off or write down the carrying amounts of those assets.

5. TURNOVER

Turnover represents the sales value of goods supplied and services provided to customers, which excludes value-added tax and is after deduction of any goods returns, trade discounts and business tax. The amount of each significant category of revenue recognised in turnover during the year is as follows:

Coalbed methane exploration and development, natural gas liquefaction and LNG distribution

The recoverable amount of this CGU is determined based on value in use calculations with reference to an independent professional valuation. The key assumptions for the value in use calculations are those regarding the discount rate and growth in revenue and direct costs during the year. Management estimates the discount rate of 20.88% (2012: 20.73%) using pre-tax rates that reflect current market assessments of the time value of money and the risks specific to the CGU. Changes in selling prices and direct costs are based on past experience and expectations of changes in the market.

At 1 January Impairment loss recognised	於一月一日 已確認之減值虧損	1,913 3,649	_ 1,913
At 31 December	於十二月三十一日	5,562	1,913

At 31 December 2013, the Group's trade receivables of approximately RMB5,562,000 (2012: RMB1,913,000) were individually determined to be impaired. The individually impaired receivables related to customers that were in financial difficulties and management assessed that the receivables were not recoverable. Consequently, specific allowance for doubtful debts were recognised.

Impairment loss on other receivables of the Group of approximately RMB194,000 (2012: RMB1,027,000) was recognised in the consolidated statement of profit or loss for the year ended 31 December 2013. The individually impaired other receivables of the Group relate to other debtors that were in financial difficulties and is not expected to be recoverable. During the year ended 31 December 2013, RMB1,050,000 (2012: Nil) of the impaired other receivables in previous years was recovered and reversed.

於二零一三年十二月三十一日, 本集團之應收賬款約為人民幣 5,562,000元(二零一二年:人民 幣1,913,000元)乃個別釐定為減 值。個別減值之應收款項與陷入 財務困難之客戶有關,且管理 估計有關應收款項不可收回。因 此,已就呆賬確認特別撥備。

	12,318	13,005

Receivables that were neither past due nor impaired relate to a wide range of customers for whom there was no recent history of default.

Receivables that were past due but not impaired related to independent customers that have a good track record with the Group. Based on past experience, management believed that no impairment allowance was necessary in respect of this balance as there has not been a significant change in credit quality and the balances are still considered fully recoverable. The Group did not hold any collateral over these balances.

未逾期及未減值的應收款項涉及 眾多客戶,該等客戶最近均無拖 欠記錄。

已逾期但尚未減值之應收款項與於本集團擁有良好往績記錄之獨立客戶有關。根據過往經驗,管理層相信由於信貸質素並無重大變動,且有關結餘仍被視為可至數收回,故毋須就有關結餘作出減值撥備。本集團並無就該等結餘持有任何抵押品。

(ii) Sensitivity analysis

The entire bank and other borrowings of the Group and the Company which are fixed rate instruments are insensitive to any change in interest rates. A change in interest rates at the end of the reporting period would not affect profit or loss.

At 31 December 2013, it is estimated that a general increase or decrease of 100 basis points in interest rates, with all other variables held constant, would increase or decrease the Group's loss after taxation and accumulated losses by approximately RMB254,000 (2012: RMB360,000). Other components of consolidated statement of changes in equity would not change in response to the general increase or decrease in interest rates.

The sensitivity analysis above has been determined assuming that the change in interest rates had occurred at the end of the reporting period and had been applied to the exposure to interest rate risk for floating rate non-derivative financial instruments in existence at that date. The 100 basis points increase or decrease is used when reporting interest rate risk internally to key management and represents management's assessment of a reasonably possible change in interest rates over the period until the end of the next reporting period. The analysis is performed on the same basis for 2012.

35. FINANCIAL RISK MANAGEMENT AND FAIR VALUES OF FINANCIAL INSTRUMENTS (Continued)

(d) Currency risk

(i) Exposure to currency risk

RMB is not freely convertible into foreign currencies. All foreign exchange transactions involving RMB must take place through PBOC or other institutions authorised to buy and sell foreign exchange. The exchange rate adopted for foreign exchange transactions are the rates of exchange quoted by the PBOC that would be subject to a managed float against an unspecified basket of currencies.

Foreign currency payments, including the remittance of earnings outside the PRC, are subject to the availability of foreign currency (which depends on the foreign currency denominated earnings of the Group) or must be arranged through the PBOC with government approval.

The group entities collect most of the revenue and incur most of expenditures in their respective functional currencies. The directors consider that the Group's exposure to foreign currency exchange is insignificant as the majority of the Group's transactions are denominated in the functional currency of each individual group entity. The Group currently does not have a foreign currency hedging policy. However, the management monitors foreign exchange exposure and will consider hedging significant foreign exposure should the need arise.

(d) 貨幣風險

(i) 貨幣風險承擔

人民幣不可自由兑換為外幣。所有涉及人民幣之外匯交易必須透過中國人民銀行或其他獲准買賣外匯之機構進行。就外匯交易採納之匯率為中國人民銀行所報之匯率,有關匯率將根據一籃子沒有列明之貨幣於受監管範圍內浮動。

外幣付款,包括將盈利匯出中國,須視乎外幣供應情況(外幣供應則視乎本集團以外幣列值之盈利金額)或必須在政府批准下透過中國人民銀行安排。

(ii) Sensitivity analysis (Continued)

The sensitivity analysis above has been determined assuming that the change in foreign exchange rates had occurred at the end of the reporting period and had been applied to the Group's exposure to currency risk for financial instruments in existence at that date, and that all other variables, in particular interest rates, remain constant. Results of the analysis as presented in the above table represent an aggregation of the effects on each of the group entities' profit/loss after taxation. The stated changes are used when reporting currency risk internally to key management and represent management's assessment of reasonably possible changes in foreign exchange rates over the period until the end of the next reporting period. The analysis is performed on the same basis for 2012.

(e) Other price risk

Oil and gas price risk

Apart from the financial instruments disclosed above, the Group's activities expose it to market risk relating to oil and gas price risks.

The Group is engaged in a wide range of gas related activities. The global oil and gas market is affected by international political, economic and global demand for and supply of oil and gas. A decrease in the world prices of cruel oil and gas could adversely affect the Group's financial position. The Group has not used any derivative instruments to hedge against potential price fluctuations of crude oil and refined and gas products. The management will consider hedging oil and gas exposure should the need arise.

Fair value hierarchy

The following table presents the fair value of the Group's financial instruments measured at the end of the reporting period on a recurring basis, categorised into the three-level fair value hierarchy as defined in HKFRS 13, *Fair value measurement*. The level into which a fair value measurement is classified is determined with reference to the observability and significance of the inputs used in the valuation technique as follows:

- Level 1 valuations: Fair value measured using only Level 1 inputs i.e. unadjusted quoted prices in active markets for identical assets or liabilities at the measurement date.
- Level 2 valuations: Fair value measured using Level 2 inputs i.e. observable inputs which fail to meet Level 1, and not using significant unobservable inputs. Unobservable inputs are inputs for which market data are not available.
- Level 3 valuations: Fair value measured using significant unobservable inputs.
